SUMMARY

Software Engineer with experience building enterprise banking applications, backend services, API integrations, and automation solutions at HSBC. Skilled in Java, Spring Boot, Python, REST APIs, Docker, Jenkins, AWS, and CI/CD practices. Experienced in designing integrations, automating operational workflows, improving release reliability, and supporting production-critical systems. Growing expertise in Kubernetes, Generative AI, Agentic AI, and Prompt Engineering. Seeking Backend Engineering, Cloud Engineering, Platform Engineering, or DevOps opportunities.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, Shell/Bash
- **Backend & APIs:** Spring Boot, REST APIs, API Integration, PEGA APIs, React
- **Cloud/DevOps:** AWS, Docker, Jenkins, Git, Kubernetes, CI/CD Pipelines
- **Databases & Tools:** MySQL, PostgreSQL, MS Access, ELK Stack, Kong Gateway, Control-M
- **AI & Productivity Tools:** GitHub Copilot, Claude Code, VS Code, IntelliJ IDEA

EXPERIENCE

HSBC Technology, Pune, India

Jul 2023 – Present

Software Engineer

- Developed and maintained enterprise banking applications supporting critical retail banking operations.
- Implemented PEGA-based APIs enabling secure integration between external applications and core banking platforms.
- Managed infrastructure setup, Kong Gateway configuration, CI/CD pipelines using Jenkins, and application component releases across multiple environments.
- Performed API validation and integration testing using Postman and Insomnia, including inbound zAPI integrations.
- Conducted production log monitoring, root-cause analysis, and automated post-release activities to improve operational efficiency and release stability.
- Led the Defect Prevention Committee (DPC), analyzing recurring production, SIT, and UT defects, identifying root causes, and driving preventive actions to improve release quality and stability.

PROJECTS

TRMF (Jenkins, Python)

- Developed Jenkins pipelines to execute automated testing workflows across enterprise applications.
- Built Python-based automation utilities for generating test cases from DXF files.
- Automated driver file generation across multiple business flows, reducing manual effort and improving testing efficiency.

PI Check Automation (Shell Scripting)

- Developed shell-script automation for post-implementation validation checks, reducing manual operational effort.
- Automated message-file summarization and log analysis to accelerate troubleshooting and debugging activities.

DPS Flow Automation (Java, Spring Boot, React)

- Designed and developed an internal Spring Boot and React application to generate dependency files for DPS API flows, eliminating manual configuration and improving developer productivity.

Task Scheduler (PHP, MySQL)

- Developed a web-based task scheduler to manage and track user tasks efficiently.

PROFESSIONAL DEVELOPMENT

- AWS Solutions Architect Associate (SAA-C03) Certification Preparation Course
- Kubernetes: Microservices
- Generative AI, Agentic AI, and Responsible AI
- Advanced Prompt Engineering Techniques
- Claude Code 101: From Prompt to Product
- Prompt Engineering Assessment (Udemy)

INTERNSHIP

IBM-ISL

Jul 2022 – Jan 2023

Intern

- Worked on log analytics and monitoring solutions for IBM Security Verify using the ELK Stack to improve observability and troubleshooting capabilities.

EDUCATION

MIT World Peace University, Pune

B.Tech in Computer Science

2023 – CGPA: 8.8

APS Kirkee, Pune

HSC (Science): 82.2% — SSC: 9.4 CGPA

ACHIEVEMENTS & ADDITIONAL INFORMATION

- Pat on the Back Award – HSBC (2025)
- **Languages:** Marathi, Hindi, English
- **Interests:** Basketball, Biking
