SUMMARY

Software Engineer with experience building enterprise banking applications, backend services, API integrations, and automation solutions at HSBC. Skilled in Java, Spring Boot, Python, REST APIs, Docker, Jenkins, AWS, and CI/CD practices. Experienced in designing integrations, automating operational workflows, and improving release reliability. Growing expertise in AWS, Generative AI, Agentic AI, and Prompt Engineering. Seeking Backend Engineering, Cloud Engineering, Platform Engineering, or DevOps opportunities.

TECHNICAL SKILLS

- **Languages:** Java, Python, Shell/Bash, SQL, C++, TypeScript/JavaScript
- **Backend & APIs:** Spring Boot, REST APIs, API Integration, PEGA APIs, React, Next.js, Microservices Architecture
- **Cloud/DevOps:** AWS, Docker, Jenkins, Git, Kubernetes, CI/CD Pipelines, Vercel
- **Databases & Tools:** MySQL, PostgreSQL, ELK Stack, Kong Gateway, Control-M
- **AI & Productivity Tools:** GitHub Copilot, Claude Code, VS Code, IntelliJ IDEA, Prompt Engineering

EXPERIENCE

HSBC Technology, Pune, India

Jul 2023 – Present

Software Engineer

- Developed and maintained enterprise banking applications supporting critical retail banking operations.
- Implemented PEGA-based APIs enabling secure integration between external applications and core banking platforms.
- Managed infrastructure setup, Kong Gateway configuration, CI/CD pipelines using Jenkins, and application component releases across multiple environments.
- Performed API validation and integration testing using Postman and Insomnia, including inbound zAPI integrations, maintaining 99.9% release stability.
- Conducted production log monitoring, root-cause analysis, and automated post-release activities to improve operational efficiency and release stability.
- Led the Defect Prevention Committee (DPC), analyzing recurring production, SIT, and UT defects, identifying root causes, and driving preventive actions to improve release quality and stability (driving 25% reduction in recurring release bugs).

IBM-ISL, Pune, India

Jul 2022 – Jan 2023

Software Engineering Intern

- Worked on log analytics and monitoring solutions for IBM Security Verify using the ELK Stack (Elasticsearch, Logstash, Kibana) to improve observability and troubleshooting capabilities, accelerating root-cause analysis by 30%.

PROJECTS

Featured Projects (Live in Production)

- **certLabOP (Next.js, TypeScript, LLM Integration):** Live cloud/DevOps certification exam platform (AWS, Kubernetes CKA, Terraform, Azure AZ-900) featuring 1,200+ scenario questions with an LLM diagnostic identifying cognitive traps and pacing bottlenecks.
- **YourFitBow! (Next.js, Prisma, PostgreSQL, Vercel):** End-to-end food ordering platform for a Pune meal delivery business with live menus, subscription plans, and WhatsApp ordering flow. Built solo via AI-assisted workflows, serving 500+ active customers.
- **Mynta Wishlist Discovery Engine (Python, Embeddings, Clustering, Vercel):** Multi-source data collection & NLP pipeline orchestrating scrapers across 7+ platforms (App Store, Play Store, Reddit, Quora, E-commerce). Processed review datasets using vector embeddings and clustering algorithms to score market opportunities.

Internal Automation & Tooling

- **PI Check Automation (Shell Scripting):** Developed shell-script automation for post-implementation validation checks, message-file summarization, and log analysis to accelerate troubleshooting and debugging activities.
- **DPS Flow Automation (Java, Spring Boot, React):** Designed and developed an internal Spring Boot and React application to generate dependency files for DPS API flows, eliminating manual configuration and improving developer productivity.
- **TRMF (Jenkins, Python):** Developed Jenkins pipelines to execute automated testing workflows and built Python automation utilities for generating test cases from DXF files and automating driver file generation.

EDUCATION

MIT World Peace University, Pune

2023 — CGPA: 8.8

B.Tech in Computer Science

APS Kirkee, Pune

HSC (Science): 82.2% — SSC: 9.4 CGPA

CERTIFICATIONS, ACHIEVEMENTS & ADDITIONAL INFORMATION

- **Award:** Pat on the Back Award – HSBC (2025)
- **Certifications & Self-Study:** Kubernetes: Microservices Architecture | Generative AI, Agentic AI, and Responsible AI | Advanced Prompt Engineering Techniques & Claude Code 101
- **Languages:** Marathi, Hindi, English | **Interests:** Basketball, Biking
